

A Taste of ICT Training Tools

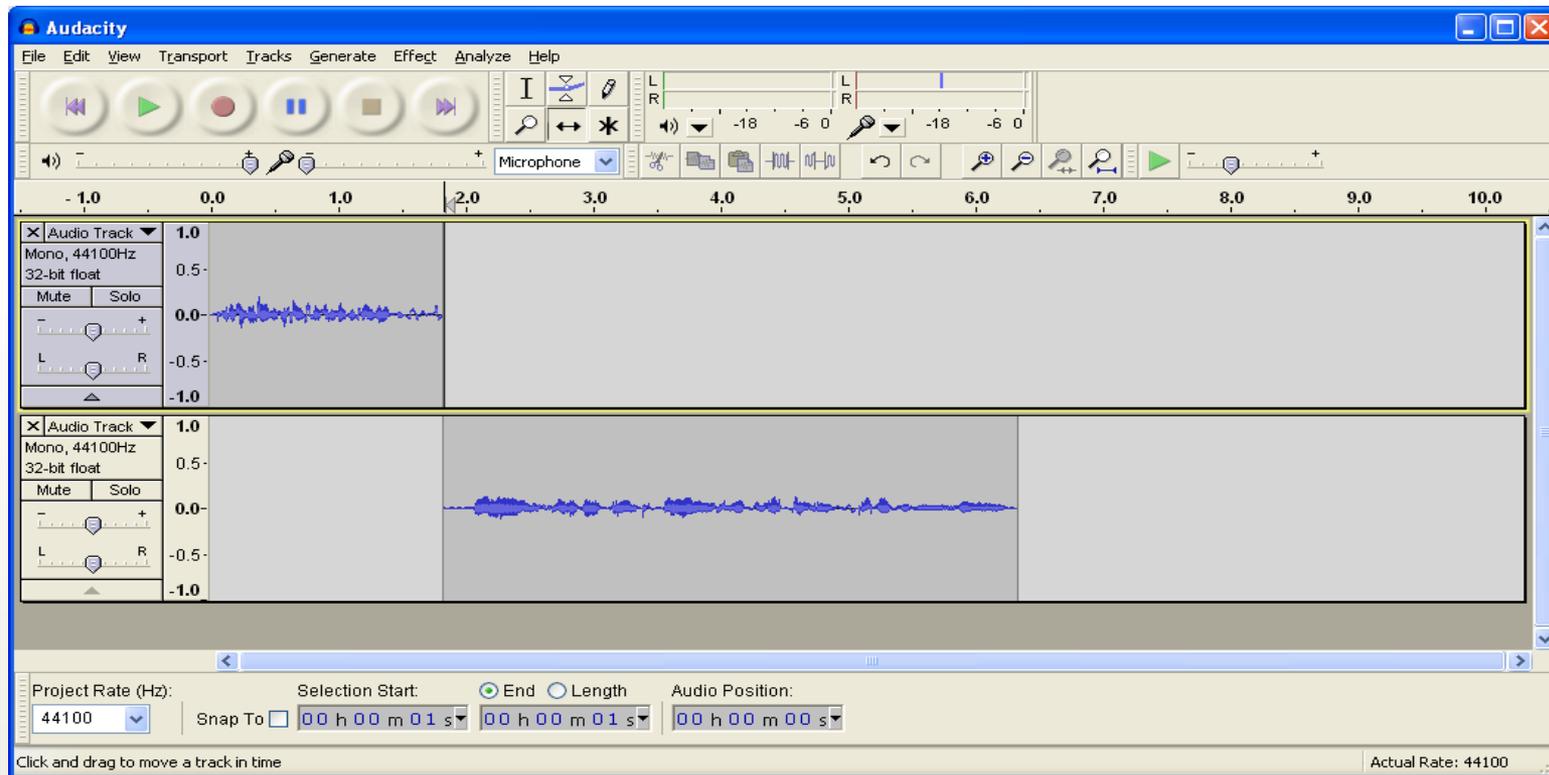

Josh Woodard

November 30, 2011

This presentation was developed for a Farmer to Farmer implementing partners workshop with support from the USAID-funded Fostering Agriculture Competitiveness Employing Information Communication Technologies (FACET) project.

Create Podcasts with Audacity

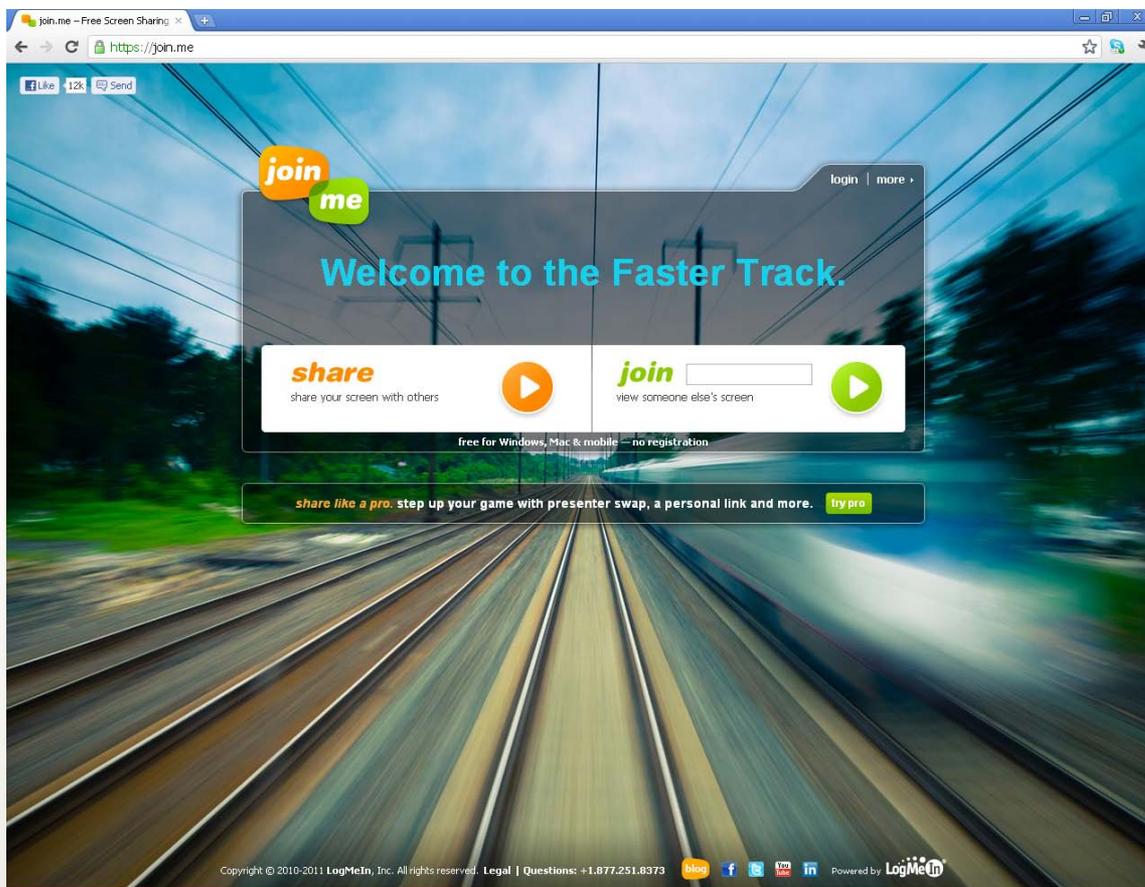

Download for free at: <http://audacity.sourceforge.net/>

Create Screencast tutorials with Jing

Download for free at: <http://www.techsmith.com/jing.html>

Instant screensharing via Join.Me

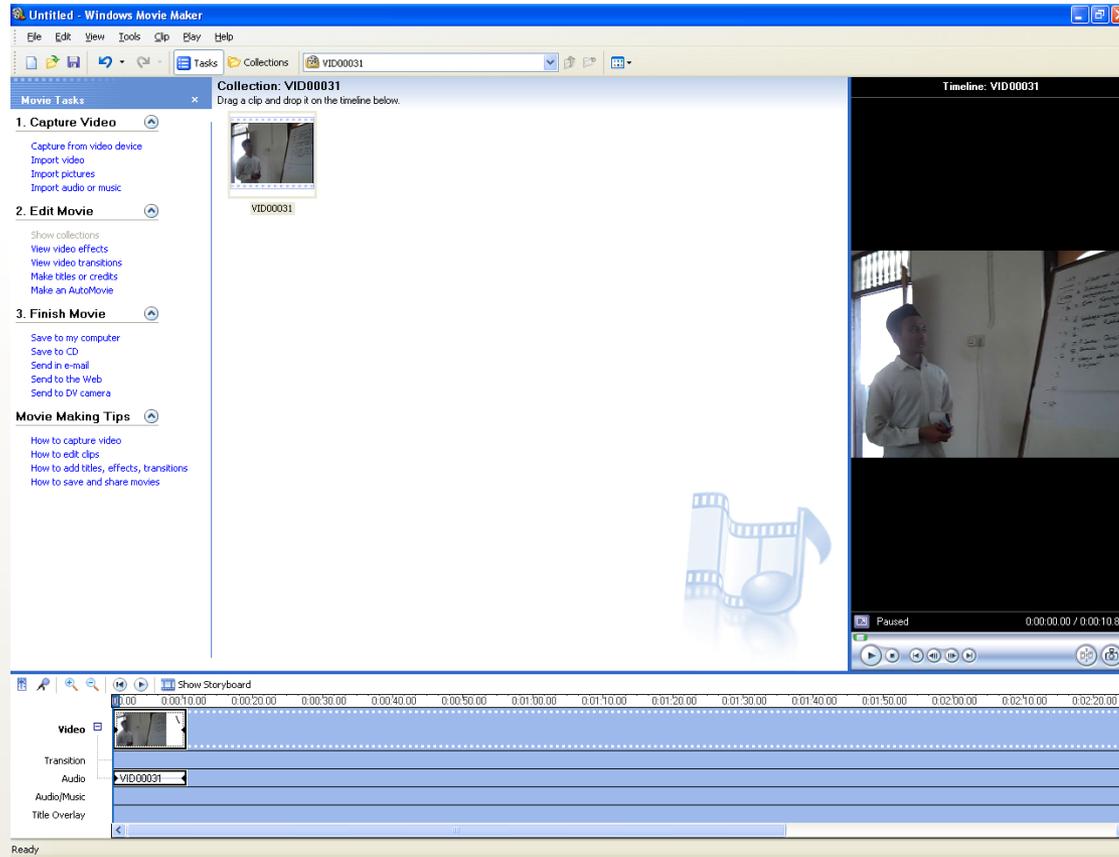

Download for free at: <https://join.me/>

Create narrated, recorded presentations

Waiting for s3.amazonaws.com...

Access for free at: <http://www.slideshare.net/>

Create instructional videos

Use Windows MovieMaker for basic editing, or download Lightworks, a powerful open source editing suite at: <http://www.lightworksbeta.com/>

A quick note on GIS

- There are a number of free GIS tools available. A few suggestions include:
 - Google Earth
(<http://www.google.com/earth/index.html>)
 - Quantum GIS (<http://www.qgis.org/>)
 - CSU also offers a course on Community-based Mapping
(<http://www.colostate.edu/Orgs/IISD/courses/Mapping.html>)
